

THE FORMWORK

# NOE® strut

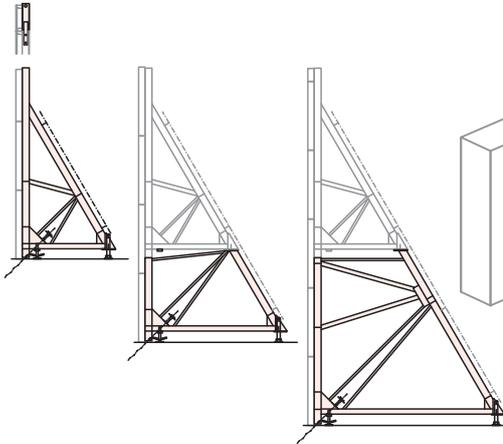

# NOE strut – Modular system for construction heights up to 7.85 m

## Modular system

For construction heights up to 7.85 m

## Simple

Formwork elements sit directly in front of the strut and are fastened with connection bows.

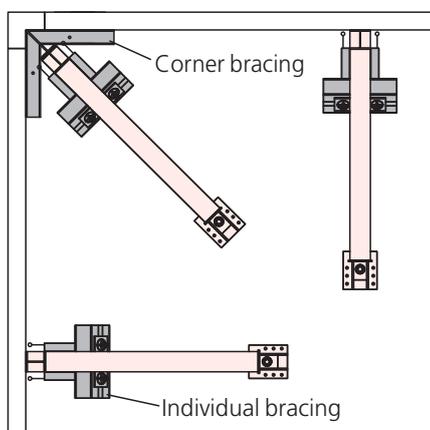

## Can be relocated as one unit

Can be moved and re-erected together with the formwork system panels.

## Reduced component depth

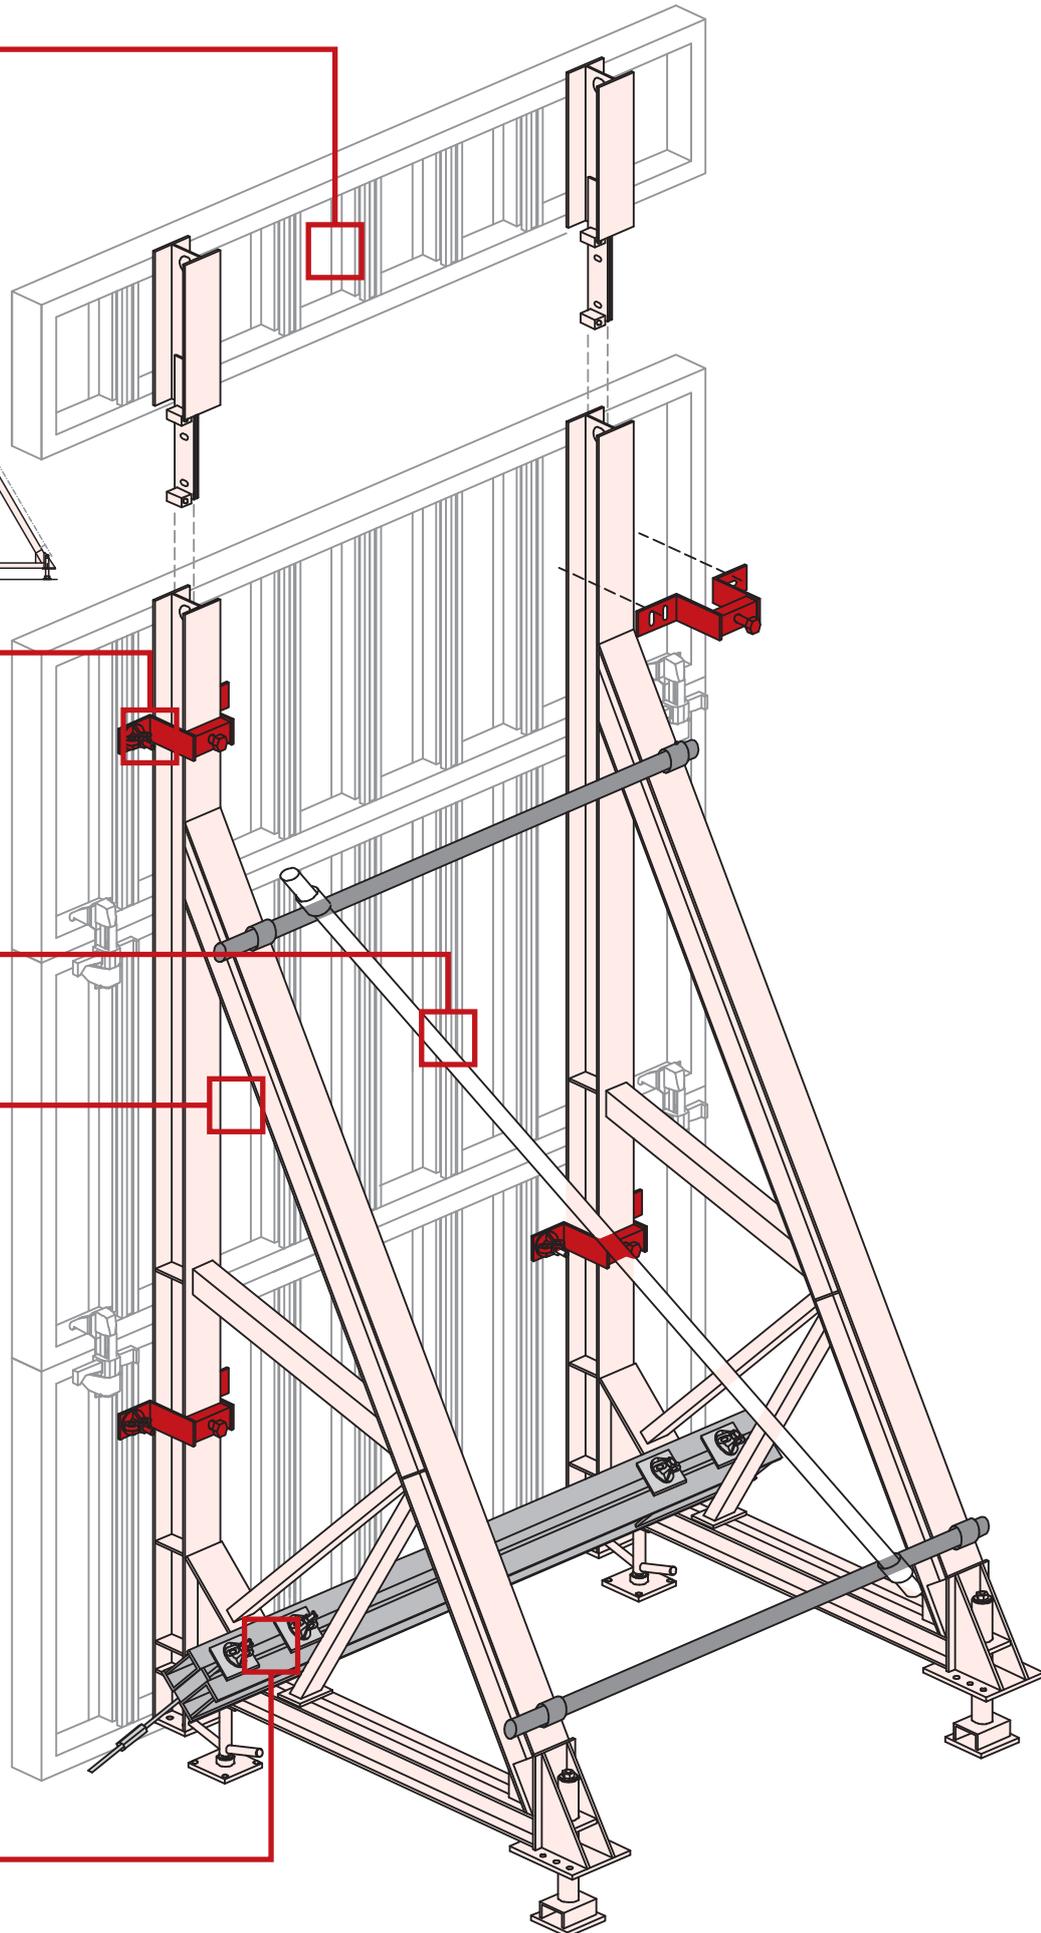

This allows them to be used in very constricted spaces.

## Internal corner solution

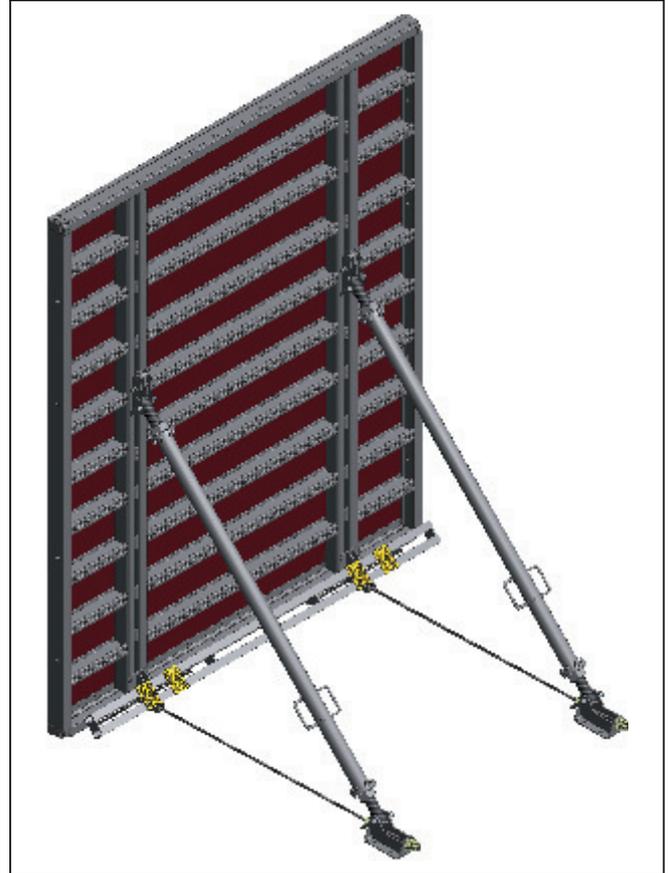

## Throughout

Continuous taping does not require precise mounting anchor.

# NOE strut light-duty NOEtop strut

## NOE strut light-duty

Comprises the following standards parts (parts can be hired):

- Easy installation
- Suitable for any formwork
- Panel heights up to 2.75 m

## NOEtop strut

Integrated into the NOEtop formwork concept. Suitable without additional bracing for single-sided formwork up to 3.31 m formwork height.
